

Label Maker Since 1980

Custom labels for every requirement

Label Maker Since 1980

Established in 1980 with the collaboration of Acumeter Labs U.S.A., Prasad Acumeter currently manufactures more than 8 lakh square meters of label stock per month with a capacity to grow to 30 lakhs.

Along with regular label stock, we also manufacture labels with custom requirements that have been developed in-house for our various customers.

Regular Label Stock

Roll Form based label stock available in multiple materials and GSMs in varied widths per customer requirements.

FACE

Chromo - 65 to 95 GSM

Maplitho - 65 to 90 GSM

Mirrorkote - 80 & 90 GSM

News Print - 40 GSM

ART - 75 to 80 GSM

Paper Board - 120 to 300 GSM

RELEASE

SCK - 65 to 135 GSM

CCK - 50 to 130 GSM

Glassine - 40 to 120 GSM

Specialised Label Stock

Roll Form based specialised label stock available in various combinations of materials, GSMs and widths.

FACE

Direct Thermal Paper

Thermal Transfer Paper

Synthetic Paper

Metallised Paper

Fluorescent Paper

Gold Foil

Silver Foil

Aluminium Foil

Metallised Polyester Film

Non-Woven Cloth

Regular Cloth

RELEASE

Polycoated Paper

Siliconised Film

Special Adhesives

We can make customised label stock in either roll form or sheet form using the following special hot melt adhesives.

Tyre Grade

High-Temperature Resistant

Removable Grade

Freezer Grade

Reactivatable

Remoistenable

Skin Compatible

INDUSTRIES & USES

Automotive

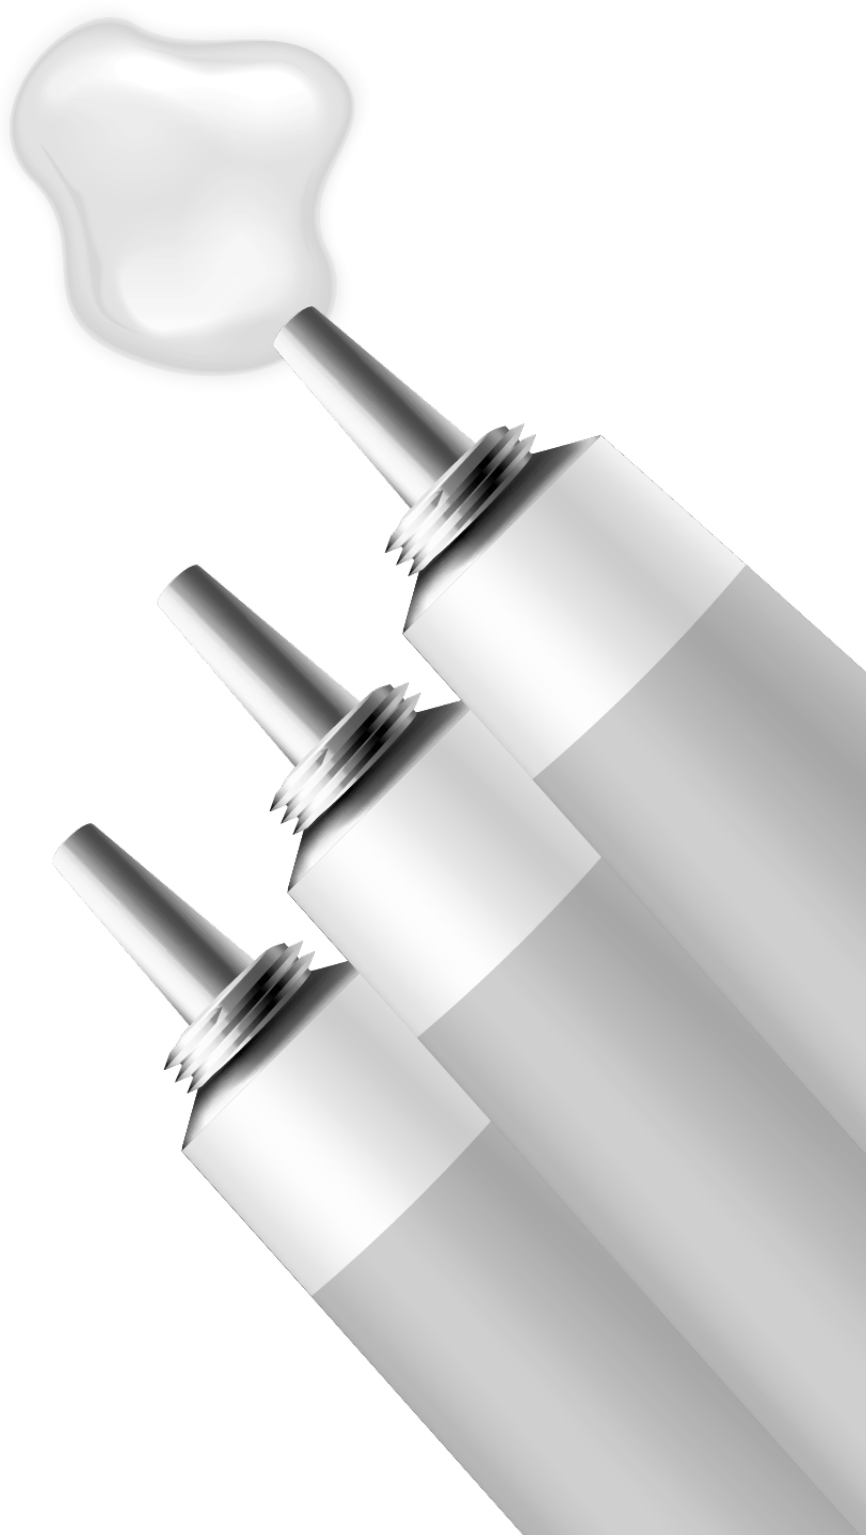

Textiles

Consumer Electronics

Beauty

Food Grade

Healthcare

Tyre Labels

Our tyre labels are engineered to bond securely to treaded rubber—one of the most challenging surfaces in labelling. Designed for tyre manufacturers, automotive suppliers, and distribution centres, they use a high-tack adhesive that firmly grips rough, uneven, low-energy rubber where standard labels fail.

Constructed with durable facestocks, heavy-duty hotmelt adhesives, and premium release liners, our tyre labels maintain exceptional print clarity and adhesion even in harsh environments involving heat, pressure, dust, moisture, and handling stress. Whether used for branding, barcode tracking, logistics, or regulatory information, these labels ensure reliable performance from factory floor to warehouse to retail.

INDUSTRIES & USES

Automotive

Stripe Coated Labels

Special label stock where the adhesive is applied only to certain parts of the label. It can be a single striped, border striped or multi striped spaced according to customer requirements. The release paper is used minimally as needed to save on costs.

INDUSTRIES & USES

Jewelry

Postage

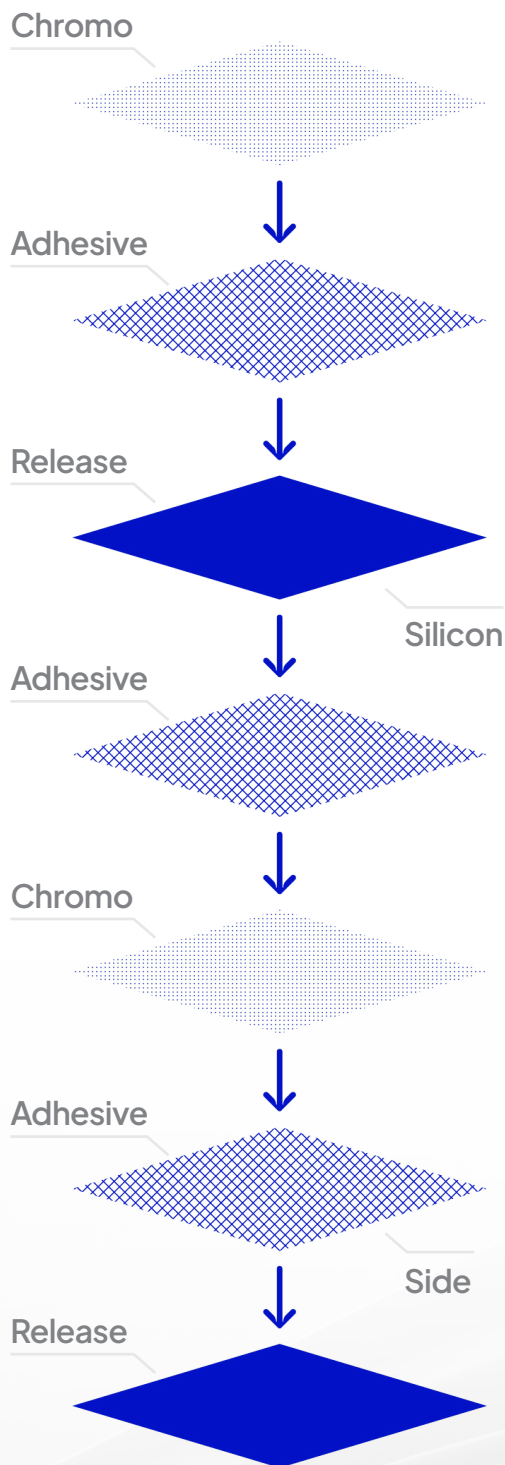

Information labels

Bottling

Pharmaceutical

Multi-Layer Labels

A special label stock developed by us for our customers, that has two face papers with either single or double release and two layers of adhesive.

INDUSTRIES & USES

If you have requirements to print on both sides of a label, this can be a perfect fit for your needs and also save on costs by using a single release paper.

Tamper Proof / Evident Labels

Label stock that has a weak face paper with minimal tear strength and hi-tack hot melt adhesive, the combination of which creates a tamper proof label.

INDUSTRIES & USES

Tax and excise labels

Non-duplicatable
applications

Transfer/Double Sided Tape

A tape that transfers the adhesive on to a desired surface like a poster without a carrier. It uses a single differentially coated release on both sides and can come in widths starting from 1" and all the way up to 10". This tape can also be designed as a double sided tape with a single release with adhesive on both sides or with two releases papers with adhesive as a sandwich. The carrier can be a Tissue, Paper, Film or Cloth.

Can be used for both hand and machine applications.

INDUSTRIES & USES

Various uses where adhesive application needs to be flexible and zoned, example: envelopes.

Digital Printable Sheets

Chromo label stock in sheet form using imported high temperature resistant adhesive the softening point of which is between 100 to 110 degree celsius backed up by either 90 or 130 GSM release paper to reduce heat transfer.

Sized to Customer Requirements.

INDUSTRIES & USES

Beauty

Shipping

R&D

Since our inception in 1980, Prasad Acumeter has developed various label products for our customers.

We pride ourselves on being able to meet our customers where they are for their specific business needs.

If you have a special application and need custom labels to be developed and manufactured, we are the team for you. During this development process, we will work with you closely to make sure we meet your business needs.
